WHAT HAPPENS AT KAIEN ISLAND DAYCARE CENTRE

Philosophy

As Early Childhood Educators, we are strongly committed to the health, safety and well being of the children entrusted to our care. It is our goal to provide an environment that encourages maximum growth and development. We believe children are entitled to an environment that fosters positive, physical, emotional, social,

and intellectual development. We also value inclusiveness, multiculturalism, independence and dignity.

Guidance

We provide two types of guidance - direct and indirect. Indirect guidance is done through the arrangement of learning centres in the classroom, daily schedules, and closely work with the parents/guardians. Direct guidance is done through careful interaction with the child.

Quality Care in a Learning Environment

We focus on a variety of themes throughout the year. Although a planned curriculum is in place, spontaneous interest by the children is our major focus. We also take the weather into consideration. We incorporate activities that foster physical, cognitive, social, emotional, and intellectual growth.
